

Education Task Force Mission Statement

To improve the quality of life for current and future downtown residents, workers and visitors, and to attract and retain families to downtown, the mission of the Education Task Force is to identify, analyze, expand, improve and promote educational opportunities in the downtown region for all citizens.

The Education Task Force will accomplish its mission by:

- Creating a master plan that is a nationally recognized model for educational excellence in San Diego's dynamic and unique urban setting
- Establishing partnerships among businesses, residents and education/cultural institutions for the purpose of maximizing opportunities to provide physical and intellectual capital in support of schools
- Conducting fair and effective analyses and public opinion research, resulting in high-quality information upon which to base decisions and recommendations regarding existing and future schools
- Striving for a creative blend of public and private elementary, middle, high schools, and colleges, to achieve a variety of educational opportunities in the downtown community
- Promoting awareness of downtown educational opportunities through regular, frequent and high-quality communications among Task Force members, between the Task Force and its represented constituents, and between the Task Force and interested agencies and citizens
